WORLD OVERVIEW

THE HEAVENLY NODE CONTINENT (TERRA/EARTH)

The world known as the "Heavenly Node Continent" is actually the ancestral home world of humanity - Terra, also called Earth or the Blue Star. Once a thriving martial empire ruled by the **Seven Martial Gods**, Terra was the center of a galactic civilization that spread the martial path across the universe.

Historical Significance

Terra served as the epicenter of martial arts development and the launching point for humanity's expansion across the galaxy. The Seven Martial Gods established a golden age where martial cultivation reached unprecedented heights, and their teachings spread to countless worlds throughout the cosmos.

Current State

After the catastrophic invasion and betrayal that destroyed the original martial civilization, the world has been transformed. The green pastures and wheat fields are gone, replaced by a cultivation-focused society that has forgotten its martial origins. The once-mighty martial empire now exists only in fragments and ancient records.

LORE & HISTORY

The Golden Age of the Seven Martial Gods

Before the great catastrophe, Terra was ruled by seven legendary figures known as the Martial Gods. These supreme beings established a galactic empire that spread

martial cultivation across countless worlds, creating a golden age of prosperity and strength.

THE GREAT BETRAYAL

The catastrophic invasion that destroyed the original martial civilization was not merely an external threat, but involved betrayal from within. This event shattered the galactic empire, scattered the martial teachings, and transformed Terra from a verdant world into the current cultivation-focused society.

THE LOST MARTIAL HERITAGE

The original martial path, with its emphasis on honor, discipline, and protection of the weak, has been nearly lost to time. Only fragments remain in ancient records, while newer cultivation systems have taken precedence in the post-catastrophe world.

THE CHILDREN OF THE CLOUDS

60 million years ago, during the PMR era, King Yupan of the Chachapoya Kingdom and his sworn brother developed the revolutionary Primal Path. Their civilization, known as the "Children of the Clouds," created a cultivation system that could utilize any non-living object as a core, fundamentally changing the nature of cultivation.
